April 5, 2015

**Photo Caption:** Foothills Compost™ is now Certified Organic by the Washington State Department of Agriculture (WSDA), a nationally accredited certifier.

Exciting company news at Foothills Compost™!

After review by the Washington State Department of Agriculture Organic Program (WSDA Organic Program), we received approval that qualifies Foothills Compost™ as a certified product for use in organic production. The WSDA Organic Program takes this certification process very seriously, and made their decision after thorough review, which acknowledges that our product is in compliance with the Chapter 16-160 WAC and National Organic Standards.

After submitting the application, WSDA required Foothills Compost™ staff to work closely with WSDA inspectors to create a cohesive systems plan. WSDA's formal recognition lends legitimacy to Foothills Compost™, creating new market opportunities for our products produced by Foothills Compost™.

We're excited to begin this new chapter as certified organic producers! For Foothills Compost™, these standards represent the minimum in ecological sustainability and we strive to go above and beyond in practicing, learning and teaching about regenerative and sustainable agriculture techniques.

We're excited to begin this new chapter as a provider of certified organic soils! For Foothills Compost™, these standards represent the minimum in ecological sustainability and we strive to go above and beyond in practicing, learning and teaching about regenerative and sustainable agriculture techniques.
